LANGUAGES

French, Romanian
Native

English
B2

TECH STACK

Programming languages
Python, JavaScript, TypeScript, HTML, CSS/SCSS

Back-end
Django, Django REST, Django Ninja, Flask, Celery, Firebase Cloud Functions, Digital Ocean Functions, pytest

Front-end
Vue 2/3, Nuxt, Quasar, Vuetify, Shadcn, Bootstrap, Tanstack, DataTables, HTMX, jQuery

Mobile
Capacitor, Cordova (Android & iOS)

Databases
PostgreSQL, Elasticsearch, Firebase Realtime Database, Firestore

DevOps
Linux, Shell/Bash, Docker, GitLab CI/CD, GitHub Workflows, Firebase CLI, Digital Ocean Registry

Tooling
Poetry, uv, npm, pnpm, Ruff, Pre-commit, Sentry, Figma

Payment systems
Chargebee, Stripe

Architecture
Design systems, API design and typed clients, auth (JWT, Keycloak, SAML, Azure AD), i18n

AI
Coding agents on production work, harnesses, agent workflow design

Refreshing
Java, C#, Angular, React

EXPERIENCE

2026 | 2021

Arcanite Solutions SA

Developer, frontend referent — Puidoux (VD) — arcanite.ch

Swiss software company of around 45 people. Worked on nine products in five years, mainly on the frontend but regularly on the backend as well. From SPAs to a legacy Django monolith, with maintenance in production over several years. Frontend referent: code reviews, design and architecture decisions, evolution of the internal guidelines.

AbaHost — private-cloud hosting for Abacus ERP — 2022–2026

Main frontend contributor on Arcanite's flagship product: 600+ hosted servers for 500+ Swiss companies, under a 99.7% contractual SLA. Frontend rework and development of a modern application integrated into the monolith, product maintenance and evolution, performance and scalability.

Compliance platform for Wecan — Geneva fintech — 2023–2025

Stack choice, involvement in design and architecture decisions, then initiated and built most of the frontend of a KYC/KYB platform with particularly complex business workflows, used by many Swiss financial institutions including Pictet, Lombard Odier and UBP.

Design system and shared libraries — 2022–2026

- Owned the internal design system and its release pipeline for three and a half years (49 versions published).
- Wrote and maintained a DataTables wrapper library used across ~100 call sites, then evaluated its retirement strategy.

Other projects at Arcanite

- Main frontend developer on SwissCoding, a search and annotation platform for Swiss medical coding.
- Built the frontend of a maritime emissions dashboard for Daphne Technology.
- Developed and maintained multiple internal services.

Python, Django, Vue 2/3, TypeScript, jQuery, GitLab CI, Docker

2021 | 2018

Independent developer

Freelance

Padel Pro — web, Android & iOS

- App to manage padel tournaments, shipped to Android and iOS from one codebase

Generic Website — landing-page generator — generic-website.com

- Landing pages generator with an extremely easy way to manage the content
- Subscription billing for the service
- Several production instances: fromageriesa.ch, jura-coiffure.ch

Swiss Association of Occupational Therapists — snase.ch

- Website with a custom CMS, with a complete but extremely simple administration

Nuxt.js, Node, Django, Capacitor, Cordova, Firebase, Stripe, Chargebee, Digital Ocean

EDUCATION

2020 | 2016

BSc HES-SO in Computer Science

HE-Arc Ingénierie — Neuchâtel

Major in Software and Multimedia Development · Swiss HES engineering degree

2013 | 2010

CESS (general secondary)

IFC Jonfosse — Liège (BE)

Adult catch-up programme, the Belgian counterpart of the Swiss maturité gymnasiale

EARLIER ENGINEERING PROJECTS

2020 | 2019

Engineering projects

HE-Arc

Built during my engineering degree, each with its own technical report.

- **YARTS (2019)** — RTS game engine in Java and LibGDX, with an entity-component architecture chosen by benchmarking three candidate designs.
- **YAARTS (2020)** — Unity and C#: a deliberate rebuild of the same game in a different engine to correct the architecture I had got wrong the first time.
- **Linor (2020)** — real-time lane detection in Python and OpenCV.

Java, LibGDX, Unity, C#, Python, OpenCV

BEFORE SOFTWARE

2016 | 2005

Professional DJ

Independent

- Residencies in Belgium, Australia and Thailand
- Mixing instructor at the first official DJ school in Belgium.
